## Severe Weather Risk - Tonight

Valid from Thu 6:00 AM through Fri 6:00 AM CST

Weather Forecast Office  
Shreveport, LA

Issued February 25, 2021 3:23 AM CT

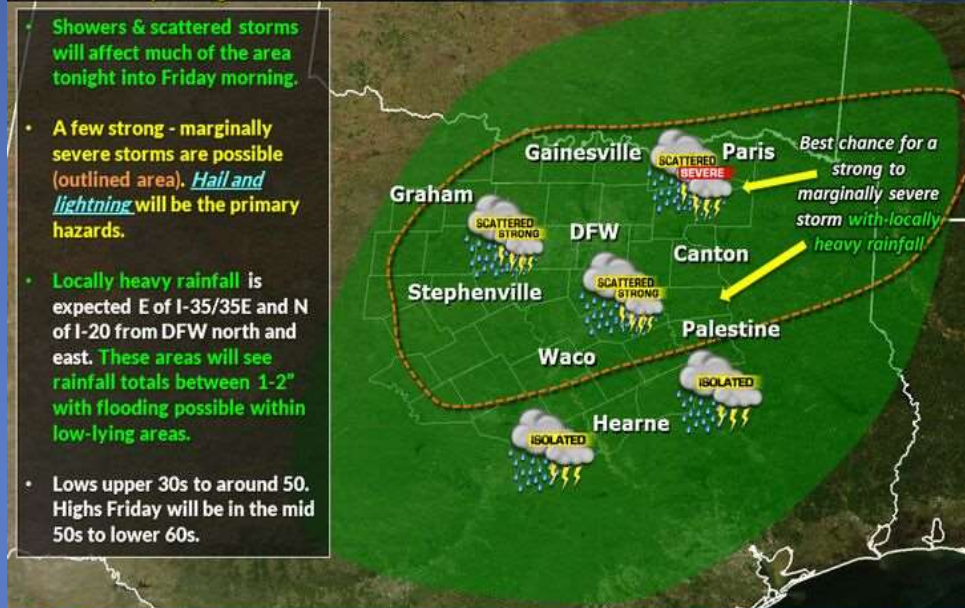

weather.gov/shv

## Storm Chances Thursday Night/Early Friday

Cold and Stormy Throughout the Period

Weather Forecast Office  
Fort Worth, TX

Issued February 25, 2021 5:51 AM CT

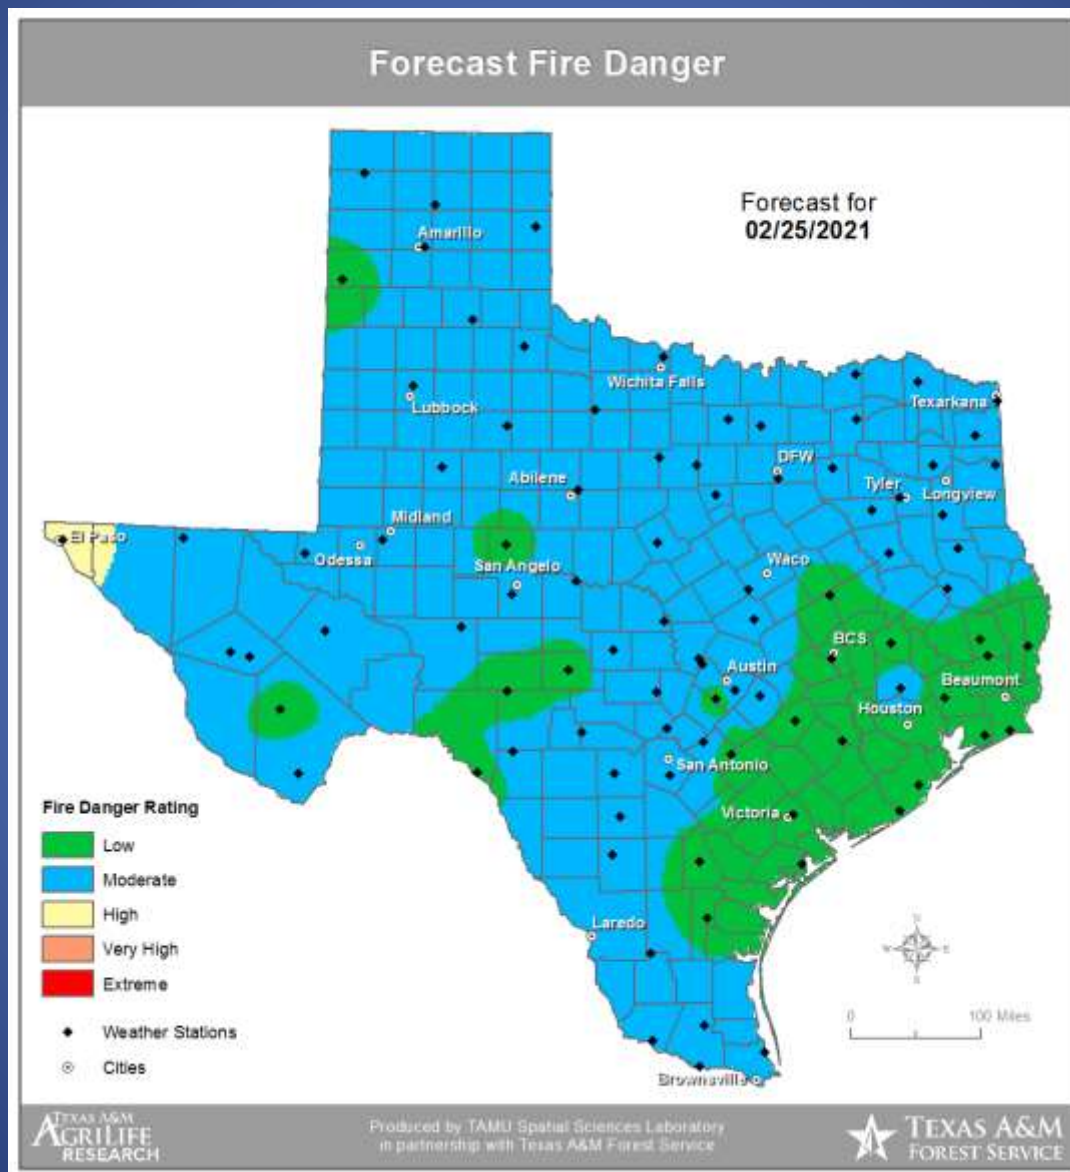

weather.gov/fortworth

There continues to be Marginal Risk for severe thunderstorms with any thunderstorm activity our area experiences later tonight. Hail would be the threat with any thunderstorm activity tonight.

A cool, wet, and stormy night tonight and Friday morning is expected across North-Central Texas. A few storms may become briefly strong to severe with hail and lightning being the primary hazards. Additionally, heavy rainfall may occur east of I-35 and north of I-20 where localized totals between 1-2" are possible. These amounts may result in minor flooding of low lying areas overnight and early Friday morning, so plan accordingly. Overnight lows will be in the upper 30s to around 50, with highs Friday ranging from the mid 50s to the lower 60s.
